Furuno ECDIS, FMD series - Online training

Approved by ClassNK

The online type-specific ECDIS training course will provide you with knowledge of the functionality and effective use of the Furuno ECDIS FMD-3100/3200/3300 series. The training course is compliant with regulatory demands for maker-approved type-specific certification.

The content of the online training course and the certificate is the same as if you attended a classroom training course.

Level: Basic.

Relevant for: Navigators operating the Furuno ECDIS FMD-3100/3200/3300 series today or are planning to do so in the future.

Duration: This online training course can be taken at your own pace, with the possibility to enter and exit the course as often as you require. Estimated time: 16 hours.

Admission recommendation: Generic ECDIS certificate.

Course content

- Familiarization with available functions and the menu structure.
- Display setup and setting of safety values.
- Recognition of alarms and malfunction indicators and the appropriate actions to be taken.
- Route planning and monitoring.
- Changing to back-up systems.
- Loading and updating charts and licenses.
- Software updating.

Training certificate: The training course includes small tests after each lesson, eliminating the need for a final, conclusive test. When you have passed all tests, a certificate will be generated immediately and issued on the NavSkills Online platform.

Technical requirements for online training: A stable internet connection.
