

OSCAR

smart vision safe navigation

920 m
12 kn

YOUR VESSEL'S THIRD EYE

OSCAR detects floating objects early, using thermal and optical cameras to catch even objects that escape conventional systems such as Radar or AIS: unsignalled craft, floating obstacles, buoys, inflatables, kayaks and persons over board.

BENEFITS

NOW YOU SEE.

- OSCAR is your intelligent, untiring 24-hour multi-purpose lookout. OSCAR detects, identifies and monitors floating obstacles of any size and kind, by day and night, and even in the most adverse conditions.
- OSCAR computes input from lowlight and thermal cameras, using latest Machine Vision technology, best-in-class deep learning capabilities and a proprietary database of millions of annotated marine objects.
- OSCAR boosts situational awareness by displaying safety-relevant information in an easy-to-understand way. Operate your OSCAR intuitively without prior training.
- OSCAR uses intelligent object recognition and makes smart decisions. Rely on OSCAR to sound the appropriate alarms at the appropriate moment.
- OSCAR systems come in a multitude of versions to fit the profiles of recreational motor and sailing yachts, commercial fleets, authorities (Police, Coast Guard, Navy), first responders (DGzRS, RNLI, SNSM etc.), and autonomous vehicle manufacturers (USV)

HOW IT WORKS

ON-BOARD UI / UX

- Augmented reality video stream combined with map view
- Intelligent alarming based on threat level

ON-BOARD CAMERAS WITH INTEGRATED IMAGE PROCESSING

- Combination of high-resolution lowlight and thermal cameras. Detection of temperature differences up to 0.05°C
- Real-time learning of water surface patterns. Discriminating water from non-water
- Detecting anomalies on the water surface
- Comparing anomalies with data base using neural network with 100,000s of filters to detect and identify marine objects

REGULAR UPDATES

PROPRIETARY OSCAR DATABASE

- 5+ million annotated marine objects
- 300,000+ nautical miles on-water experience around the world
- Continuously growing and improving
- Regular over-the-air updates (e.g. red sea update, iceberg update)

OSCAR SENTRY

Comprehensive optical and thermal camera setup, complemented with a powerful external processing unit. Longest detection range, widest detection angle and fastest detection frequency improve performance in unfavorable sea conditions. Object tracking and manual panning/tilt support 360° perimeter surveillance both at anchor and under way.

Superior 360° situational awareness and surveillance for commercial vessels, government craft, first responders and motor yachts.

TOTAL AWARENESS

OSCAR SENTRY KEY FUNCTIONS

COLLISION AVOIDANCE
Forward panning. Intelligent alarming of impending collision risk with objects in the vessel's path.

PERIMETER SURVEILLANCE
360° scanning of a vessel's surroundings. Intelligent alarming of approaching objects entering a selected perimeter.

OBJECT TRACKING
Keep selected object in the screen center to track a tender or keep an eye on suspicious developments.

MANUAL CONTROL
Investigate areas and objects of interest using 16x electronic zoom.

OSCAR OFFSHORE

OSCAR OFFSHORE ONE

The compact sailing OSCAR: A revolutionary design with 3 cameras (1 RGB, 2 thermal) and AI processing unit contained in one single masthead unit to save space, weight and energy.

OSCAR OFFSHORE 320

The ocean wanderer's OSCAR: Standard detection range for safe offshore cruising with an eye on energy consumption. Advanced electronic image stabilization and 6 frames/second detection frequency for reliable performance even in unfavorable sea conditions.

OSCAR OFFSHORE 640

The ultimate sailing OSCAR: Full processing power together with highest resolution thermal cameras deliver higher display resolution, improved e-zoom capabilities and superior detection performance (extended range, smaller objects) for serious offshore sailing in uncompromising safety.

State-of-the-art AI-based safety and convenience for blue water sailing.

LARGE VESSEL

The OSCAR system feeds into your chart plotter, on-board computer, tablet or smartphone. The user interface displays a choice of three viewing modes: low light augmented reality view, thermal augmented reality view and map view.

OSCAR COMPETITION

OSCAR COMPETITION 320

The reduce-to-the-max racing OSCAR: Ultra-lightweight 750g masthead camera unit for rotating rigs. Standard detection range, electronic image stabilization, automatic mast rotation compensation, +/-50° manual panning, reduced energy consumption.

OSCAR COMPETITION 640

The radical racing OSCAR: Ultra-lightweight 750g masthead camera unit for rotating rigs. Extended detection range, advanced electronic image stabilization, automatic mast rotation compensation and +/-50° manual panning.

Ultra-lightweight units for rotating masts of performance yachts and offshore raceboats provide reliable object detection when the name of the game is “go to the limits and come back alive”.

LARGE VESSEL

Control your OSCAR system with the OSCAR APP on your smartphone or tablet (android and iOS), your chart plotter or an onboard computer.

AT YOUR SERVICE

INSTALLATION SUPPORT

The OSCAR dealer and service network is growing fast. For professional installation of OSCAR units and ongoing support, please consult your nearest dealer.

OVER THE AIR UPDATES & PERFORMANCE IMPROVEMENTS

OSCAR Artificial Intelligence draws from an ever-growing database. Updates at regular intervals make your OSCAR system smarter and smarter.

REMOTE SOFTWARE SERVICE SUPPORT

Remote support ensures the reliable performance of your OSCAR system wherever your yacht is headed - and that includes the remotest corners of the planet.

PRODUCTS & PRICES

OSCAR SENTRY

Art. Nr.	Product	Description	MSRP Incl. 20% VAT (€)
6100	OSCAR SENTRY	OSCAR Sentry unit; 2 thermal cameras 640 x 512 px, 25° HFOV, 14 mm and 640 x 512, 8° HFOV , 50 mm; 2 low light RGB cameras 2560 x 1944 px , 34° HFOV , 8 mm and 2560 x 1944 px , 8° HFOV, 35 mm; pan and tilt range 360°/±20°	39,999
6120	OSCAR SENTRY Installation kit, 10 m	Special OSCAR Sentry cable set with connectors (power and data combined) for connection between Sentry unit and boat systems; 10m length; mounting bracket, mounting screws; suitable for item 6100	790
6121	OSCAR SENTRY Installation kit, 20 m	Special OSCAR Sentry cable set with connectors (power and data combined) for connection between Sentry unit and boat systems; 20m length; mounting bracket, mounting screws; suitable for item 6100	1,290

An annual software license must be paid one year after the software registration (the first year is free), to ensure the full functionality of the system. The cost of the annual software license is € 999 (incl. VAT) for OSCAR SENTRY. The annual software license is required for performance improvements (object detection, AI functionality) and compatibility updates (smartphones, tablets, ...) and does not include installation nor services. Expired licences will limit the alarming function.
